Why many companies no longer use Shoemobiles!

How much are Shoemobiles really costing you?

Shoemobiles

- ✓ Loss of production time and money
- ✓ Time scheduling problems
- ✓ Trailer logistics issues
- ✓ Limited availability of styles and sizes (only 40 - 60% fill rate)
- ✓ Drivers push shoes on Shoemobile often leading to unhappy employees
- ✓ It's not unusual for shoes to cost over 20% more than the same product bought by phone or online

The question is, **"Do you really want to pay the costs* associated with a Shoemobile?"**

* Liability insurance, maintenance, fuel surcharges, driver's salary and other hidden costs added to the price of your shoes

There is a better way!

ORR Shoe Express... it's Easy and Fast!

It's Easy Just go to our online shoe catalog at www.orrsecurity.com and choose from over 200 styles of shoes or select a style from this brochure and call **800.949.6155** to order.

It's Fast All orders placed by 2:00 p.m. EST are guaranteed to ship out the same day. Next day delivery is also available.
